DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to heteroaryl-hexanoic acid amide derivatives, classified in class 544, subclass 353 +.
- II. Claim 15-17, drawn to method of use or treatment, classified in class 514, subclass 249.

Inventions of Group I and Group II are related as product and method of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) that the process for using the product as claimed can be practiced with another materially different product or (2) that the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of using the product as claimed can be practiced with another materially different product, such as heterocyclic hexanamides (US 4,923,864), amidine derivatives (US 6,653,312), aryl(alkyl)propylamides (US 5,731,352), α -hydroxyarylbutanamine (US 6,696,494).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the two groups designated above would indeed impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

A telephone call was made to Christine S. Lee on 5/6/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised to elect a species of the invention to be examined for search purposes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chukwuma O. Nwaonicha whose telephone number is 571-272-2908. The examiner can normally be reached on Monday thru Friday, 8:30 am to 5:00pm.
